Orrin,

See the attached letter by David Traster of October 29, 2018, on behalf of his clients, raising questions principally regarding how the Mystery River drainage and prior appropriation/minimum desirable streamflow (MDS) issues might relate to a LEMA to resolve the Quivira impairment, as well as my response provided yesterday. My response was provided, in part, as a condition of his clients withdrawing their request for judicial review (Crane vs Barfield).

Let me know if you have any questions.

David
