

Our water situation is becoming critical! We must change to conservative measures! This should be across the board — and not be based on ways for the big irrigators to continue in present overpumping!

I am 78 yrs. old. Have been involved in farming all my life. Irrigation & dry land — so I am aware of both sides. The last 2 yrs. we have lowered the pipe in our pasture well 17 ft & 23 ft. This is scary!

I want water to drink — for me & my grandchildren.

Thank You
Sharon Stramel
