2022 Management Plan

For CLARK	County
FRANK, WHITE	, County Weed Director

Specify the goals and priorities of the program for the coming year.

Control all noxious weeds on Clark County owned properties with special emphasis on the Counties road ways. Provide information to the public, spray techniques, chemical, and assist anyone trying to control thier noxious weeds. Will be focusing on controling problematic areas of noxious weeds, particularly Field bindweed and Johnson grass which is the Counties two main noxious weeds. We will continue to look for any other noxious weeds and provide guidence and assistance for others who are having problems controling their noxious weeds.

Specify the goals and priorities of the program for the next five years.

control and prevent the spread of noxious weeds in the Country. We will focus maintaining the control on the noxious weeds we have and the prevention of new spreads and species of noxious weeds.

Describe the areas which noxious weed species are known to occur within the county and specific locations of new infestations and areas particularly susceptible to new infestations. it is found in all parts of the County Field bindweed found mostly in northern part of County Musk thistle once spotted in the SW corner of County Sericea lespedeza found in all parts of the County Johnsongrass found mostly in northern part of county in low areas Bur ragweed Canada thistle none none Hoary cress Leafy spurge none Quackgrass none Kudzu none Russian knapweed none

List any non-noxious invasive weed species you plan to control and the types of integrated weed control				
methods you plan on using on them.				
List your planned integrated weed management goals and procedures, including but not limited to biological				
control agent selection and distribution, pesticide selection and application and cultural and mechanical				
controls.				
Biological Controls				
<u>Chemical Controls</u>				
This is the main method used in Clark Country to control their noxious weeds. We spray infested				
areas and Chemical mow in the spring. The department uses a verity of authorized chemicals to kill				
noxious weeds. Which helps prevent their spread, and allows the desirable plants to move in.				
Cultural Controls				
Machanical Cantrola				
Mechanical Controls				
The only mechanical control used is the mowing of the right of ways. Which really only delays a
